INSTRUCTION MANUAL
Quad Dogs™

DOG

QUAD BASE

1 x Quad Base ◄

1 x Dog ◄

Whichever size dog you need you will also need a quad dog base. These instructions apply for every size dog we make. We are using a 60mm dog for the purposes of demonstration.

STEP 1

Put the base together as shown.

STEP 2

Screw the dog onto the base
- not too tightly.

STEP 3

Push the Quad Dog through your
MFT hole and tighten as much as
possible. The Quad Dog should now
be tight and secure in place.
